DETAILED ACTION

Request for Continued Examination

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/20/2009 has been entered.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeannie Boettler on 9/24/2009.

IN THE CLAIMS:

1. Please cancel claims 31-48 and 50.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a single-use lip treatment comprising 60 to 65% by weight of

a water-soluble film forming polymeric material, from about 0.01% by weight to about 50% by weight of a moisturizing agent, and from about 0.1 to about 50% by weight of a solidifying agent, wherein the single-use lip treatment product is a film that is capable of substantially dissolving on lips in no more than about 50 seconds and comprises a single layer.

The closest prior art is Pospischil (US Patent 3,803,300) in view of Horizumi (EP 1,136,057) and Watanabe (JP 61-176512). Pospischil teaches shaped ointment bodies that are applied to the skin and include film forming agents, humectants and occlusive-type moisturizing agents. However Pospischil does not teach amounts of the water-soluble film forming polymeric material in amounts of 60 to 65% or solidifying agents. Horizumi teaches a single-layer sheet cosmetic composition comprised of a water-soluble polymer in amounts of 0.0001-50 wt % and Watanabe teaches solidifying agents for lip treatments. However, none of the references teach or suggest a product comprising from about 60% by weight to about 65% by weight of a water-soluble film forming polymeric material.

It is noted that Horizumi teaches amounts of the water-soluble polymeric material ranging from 0.0001-50 wt% but discloses that it is preferable to include 0.01 wt% to 10 wt%; therefore, leading one to use lower amounts. It is further noted that the composition of Horizumi is intended for the face as it is taught that there is a hole for the mouth when using the product on the face. Accordingly, there is no teaching in the prior art of a composition containing a water soluble film forming polymeric material in an amount from about 60% by weight to about 65% by weight that will produce a film

that is capable of substantially dissolving on the lips in no more than about 50 seconds and comprise a single layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
